

ENGINE MONITORING SYSTEM

OVERVIEW

- EMS constantly monitors real-time engine and transmission parameters
- If one parameter is exceeded, the EMS initiates a shutdown warning
- Once the vehicle comes to a stop, EMS cuts the engine power to prevent damage and disable the fuel pump

**PLUG AND PLAY
EASY TO INSTALL**

WHY ENGINE MONITOR

EASY TO USE

Dash-mounted LED panel is easy to operate. The EMS reduces catastrophic powertrain failures.

DUAL ALERTS

If anything happens there is an audible and visual warning so the driver can see what is happening in real time.

HISTORICAL EVENT TRACKING

Find out which vehicles are creating problems over time with historical event tracking.
