ONE BOX. MANY SOLUTIONS.

Many of our modules work with Ford Interceptor, Charger Pursuit, and Chevy Tahoe vehicles

Surveillance Mode

It automatically raises the windows, locks the door and warns the officer if someone or something is approaching from behind.

Eco-Lock

Automatically turns the engine off and back on to save fuel from constant idling. Works with the key out of the ignition and the doors locked.

Idle Lock

Keeps the battery charged with this high idle system. Works with the key out of the ignition and the doors locked.

Black Out Module

Turns off all the interior and exterior lights off when the vehicle is driving at slow speeds.

FlexTech System

Complete vehicle electrical load control system, customizable to your needs.

AFIS III

Field adjustable high idle system that idles at three adjustable speeds.

Police Interface Module

Allows for custom programming of the AUX or VOLUME/SEEK buttons on the steering wheel. Optional key off function the AUX switch version.

Upfitter Interface Module

Up to eight programmable outputs, along with 10 digital outputs and one analog output. They can be configured as momentary, latched, flashing or timed.
