

UPFITTER INTERFACE MODULE™

PROGRAMMABLE CAN DATA ACCESS SYSTEM

OVERVIEW

- The UIM has up to eight programmable outputs
- Ten separate digital outputs and one analog output, along with eight low-current outputs
- Outputs can be configured as momentary, latched, flashing, or timed

EASY INSTALLATION

PLUG & PLAY

Safe, Simple and Reliable

WHY UPFITTER

FLEXIBLE DESIGN

Saves time, cost, and additional components. User interface makes reprogramming output functions by clicking a button.

CONTROL

Multiple inputs can control a single output.

CONVENIENCE

The UIM communicates with Ford, Chevy, and Dodge CAN as well as J1939 to provide real time chassis data. Easy troubleshooting LED notify the driver of any issue.
