

DISTRIBUTOR FOR MANUFACTURERS OF COMMERCIAL VEHICLE PRODUCTS

WHAT WE DO

As the master distributor for InterMotive Vehicle Controls and other manufacturers, LGS Group sells unique solutions to fleets, agencies and upfitters facing commercial vehicle safety and performance challenges.

With offices in California, Nevada, Indiana and Michigan, LGS Group sales managers travel throughout North America to consult with customers and assist in finding the best option.

We also attend local and national trade shows, expos and conferences.

WHO WE SERVE

We specialize in selling class 1-7 commercial vehicle products in these industries:

- Transportation: Transit, Shuttle, School Bus and Personal-use Mobility
- Emergency Response: Law Enforcement, Ambulance and Fire Trucks
- Work Truck and Vocational Vehicles
- Recreational Vehicles

PRODUCT SOLUTIONS

The diverse collection of InterMotive systems we sell utilize plug and play connections to the OEM chassis to minimize the cutting of factory wires.

Product types offered include:

- CAN Data Acquisition (Passive, Active, Commands)
- Forward/Reverse Assistance Systems
- High Idle
- Idle Mitigation
- Interlocks
- Law Enforcement Specific
- Load Control
- Safety/Security
- Speed Limiters
- Switch Control
- Electrification/Solar

APPLICATION EXAMPLES

CHALLENGE 1: Idling

The vehicle needs to idle to keep the boom lift in operation, but idling wastes money and causes engine wear.

SOLUTION: The InterMotive EcoStar™ idle reduction system automatically turns the engine off and on when specific customizable conditions are met, while allowing full functionality of equipment.

CHALLENGE 2: Theft

The vehicle needs to keep the engine running while the driver assists patients or passengers away from the vehicle, but the risk of theft is high.

SOLUTION: The InterMotive IdleLock™ theft prevention system allows the vehicle to idle securely, locked in Park, with the key removed from the ignition.

CHALLENGE 3: Equipment Control

The carpet cleaning machine needs to start automatically when the vehicle is in Park and the parking brake is set.

SOLUTION: The InterMotive Upfitter Interface Module® programmable device passively reads OEM CAN data to help control or activate equipment when specific vehicle conditions are met.

WHO WE ARE

Founded in 2014 by Linda and Greg Schafer, LGS Group is headquartered in Reno, Nevada. The company was created to focus on sales and marketing as the master distributor for InterMotive Vehicle Controls. LGS Group has since expanded and partnered with multiple manufacturers to sell custom products that compliment InterMotive's performance and safety solutions.
