

Pre-Trip Module

Light Cycling and Bluetooth CAN Data

Overview

- Automatically rotates through all the exterior lights including brake and reverse
- Allows for a single person to complete a pre-trip inspection
- Simple plug and play connections for CAN data
- Some wire connections required to cycle exterior lights

Features

- **RELIABLE:** Easily determine if all exterior lights are working properly
- **EFFICIENT:** Exterior lights are activated in a pre-determined repeating sequence, so an inspector can walk around the entire vehicle
- Customizable timer for the light sequence
- Works with Revecorp's TransitCheck for electronic pre-trip and post-trip inspections
- Works with Bluetooth-enabled devices to provide vehicle data for third-party software packages
- Includes Intermittent Fault Filter™ (IFF) technology to eliminate false readings

Product features may vary by make, model or year. See instructions for complete details.
